A new name *Cyclammina saidovae* nom. nov. is proposed for the species *Cyclammina pseudopusilla* described by Hanagata (2003, p. 312, 316, pl.4, figs. 2–5). This species is a junior homonym of *C. pseudopusilla* Saidova (1975, p. 86, pl. 24, fig. 8). The newly proposed name is a dedication to Professor Khadyzhat Magomedovna Saidova for her significant contribution to the study of modern foraminifera from the Pacific Ocean.
